Beyond the electric arc furnace.... HBI has for long been perceived, primarily and correctly, as a metallic feedstock material for the EAF. However, HBI offers potential for use as a blast furnace burden material under certain conditions, a potential that has been evaluated and exploited by various steel mills around the world.

Hot Briquetted Iron - beyond the electric arc furnace

What Electric furnaces provide over Steel furnaces is module slots, and the potential to be powered by solar energy or now nuclear energy instead of by fuel only. The former can potentially mean a net fuel savings (as long as over half your total energy comes from solar panels you consume less fuel by switching to Electric furnaces than you do continuing to use Steel furnaces).
