Cam selection, if you choose a 308 cam, in a 253 the specs will increase, for example power band in a 308 maybe 3000-6000 rpm, the same cam in a 253 will be 4000-7000 rpm. You dont need roller rockers unless you revving past 6500 all day, the only real benifit is less flex in the valve train and less friction. so less loss in lift, etc. Get ...

Operation of the valve train in "L" range is as described in the Trimatic Shop Manual. Codes HO (253) & HP (308) - Downshifted Position (FIG. 14): With the vehicle operating under light throttle, modulator pressure on the end spool of the shift control valve is insufficient to move the control valve against the force of the shift valve spring. Under these conditions the spring is the only force opposing governor pressure on the shift valve.
