Chapter 21 Genomes and Their Evolution. Lecture Notes. Overview: Reading the leaves from the tree of life. The chimpanzee genome was sequenced by 2005, two years after the sequencing of the human genome was completed. Comparing the genomes of bacteria, archaea, fungi, protists, and plants provides information about the long evolutionary history of shared ancient genes and their products. With the genomes of many species fully sequenced, scientists can study whole sets of genes and their ...
