## Gender And Climate Change Impacts

Women and men are experiencing climate change differently, as gender inequalities persist around the world, affecting the ability of individuals and communities to adapt.; Recognising the important contributions of women as decision makers, stakeholders, educators, carers and experts across sectors and at all levels can lead to successful, long-term solutions to climate change.

## Gender and climate change | IUCN

Women commonly face higher risks and greater burdens from the impacts of climate change in situations of poverty, and the majority of the world's poor are women. Women's unequal participation in decision-making processes and labour markets compound inequalities and often prevent women from fully

contributing to climate-related planning, policy-making and implementation.

## **Introduction to Gender and Climate Change | UNFCCC**

Climate change and gender is a way to interpret the disparate impacts of climate change on men and women, based on the social construction of gender roles and relations.. Climate change increases gender inequality, reduces women's ability to be financially independent, and has an overall negative impact on the social and political rights of women, especially in economies that are heavily based ...

## **Climate change and gender - Wikipedia**

GENDER AND CLIMATE CHANGE ASIA AND THE PACIFIC Policy brief 1 Background The degree to which people are affected by climate change impacts is partly a function of their social status, gender, poverty, power and access to and control over resources. Despite the international community's increasing acknowledgement of the differential

## **Overview of linkages between gender and climate change**

Beyond the impact of climate change, Nagel reveals the gendered bias of the military-science complex and climate change science, a male-dominated field from the developed world. She maintains that "human" universalism, as used by climate scientists, infers objectivity that belies inequality among humans.

Whereas the concepts of class, poverty and race make regular appearances in social scientific analyses of global climate change, the same cannot be said for gender.

## **Gender and climate change: From impacts to discourses**

...

The small amount of gender-sensitive work that exists has been carried out by gender, environment and development (GED) researchers working for the UN and non-governmental organisations who focus almost exclusively on the material impacts of climate change on vulnerable women in the Global South.

## **'Gender and climate change': from impacts to discourses**

...

The impacts of climate change are not gender neutral, so strategies to address them cannot be gender neutral. Men and women have differing coping and adaptive capacities - and different access to and control over resources - that translate to both gender-differentiated vulnerabilities to the impacts of a changing climate, and differentiated strengths to adapt to these changes.

## **UNDP Climate Change Adaptation: Impact Gender**

Effective climate change adaptation recognizes that women, men and children experience impacts differently depending on where they live, how they sustain their livelihoods, and the roles they play in their families and communities.

## **Why Gender Matters in Climate Change Adaptation ...**

Gender influences response. The report - Gender, Climate & Security: Sustaining Inclusive Peace on the Frontlines of Climate Change - features case studies from across the globe. They reveal how gender norms and power structures determine how women and men are affected by, and respond to, crises.
