Ground Improvement - E-bok - Klaus Kirsch, Alan Bell ...

A comprehensive understanding of soil behaviour, combined with experience of the technique, is therefore vital to successful improvement of the ground. Dynamic compaction is capable of achieving significant improvement to substantial depth, often with considerable economy when compared to other geotechnical solutions.

Pressure grouting or jet grouting involves injecting a grout material into otherwise inaccessible but interconnected pore or void space of which neither the configuration or volume are known, and is often referred to simply as grouting. The grout may be a cementitious, resinous, or solution chemical mixture. The greatest use of pressure grouting is to improve geomaterials (soil and rock).

Pressure grouting - Wikipedia

(2003), Grouting and Ground Treatment, Proceedings of the Third International Conference, February 10-12, 2003, New Orleans, LA, ASCE Geotechnical Special Publication No. 120, ISBN 978-0-7844-0663-2
