[PDF] Introduction To Practice Of Molecular Simulation ...

In a molecular simulation of a suspension composed of solid particles in a liquid, it is very difficult to treat the multibody hydrodynamic interactions among the suspended particles. Hence, it is usual to model the flow field as a simple shear flow, and under this approach only the motion of the suspended particles will be solved during the simulation.

Goal: To familiarize students with techniques used in the molecular biology laboratory through practice of proper pipette technique, centrifuging, and following a protocol. Gloves are used with hazardous material. Materials: 1. A set of 3 pipettes per group (2 - 20 μ l, 50-200 μ l, and 200 - 1,000 μ l) 2. Three

boxes of corresponding pipette ...
