Re: Solex 40 PII adjustment dilemma #15 Post by Sterling Vaden » Fri Sep 28, 2012 2:04 pm If you have inconsistent output from the accelerator pumps, it could be your measurement method, (this is not easy) or it could be that the accelerator pump check valve is not seating properly perhaps because there is a bit of debris in there.

Solex 40 PII adjustment dilemma - Porsche356registry.org

Solex 40 PII-4 Problem..Help! My 1969 912 Targa has split-shaft Solex's that were impossible to synchronize with a UniSyn. Only the front air-mix screws worked the other two rear ones were dead. So I rebuilt both carbs and set float height and accelerator jet volume to the shop manual specs. The plastic floats were OK too no leaks and moved freely.

Venturi (or choke if you like) for the Solex 40 PII carburetors. New production venturis to suit the PII 40 carburetors as used on the Alfa Romeo 1900. Please note that these venturis are the " machined " type as opposed to the " cast " type as used in the PII for the Porsche 356. Demand is low so these are made to order for us.
